AGEC Website Audit, UAE SEO & Lead Generation Plan

Oct 30, 2026 · @Abdulrahman Altaher

1. Executive summary

AGEC has a solid base: four well-built service pages and an unusually transparent AMC page. Leads leak through trust contradictions, no pages for the highest-intent searches (AC repair, duct cleaning, commercial maintenance), and no verified tracking.

Scope of this audit. I read 13 pages of agec.ae on 30 Oct 2026. I could not open robots.txt or sitemap.xml, see structured data, run PageSpeed, view the site on a phone, or see Search Console, Analytics or Google Business Profile data. Those items are marked NOT VERIFIED throughout and listed in Section 10. Labels used: **V** verified on the live page, **H** hypothesis from what I saw, **NV** not verified.

Five biggest weaknesses

1. **Contradictory claims.** The homepage says "All 7 Emirates" and "3 Emirates Served"; About says three emirates. Google reviews are shown as 27 on some pages and 17 on others. The thermostat page says "hundreds of UAE homes" while elsewhere you cite 30+ projects. The founder's name is spelled two ways. (V)
2. **Missing pages for money searches.** There is no AC repair page, no standalone duct-cleaning page (only a thin sub-page) and no commercial maintenance page. (V)
3. **Pages compete with each other.** /services/maintenance, /ac-maintenance-dubai and /ac-amc-dubai target overlapping terms. (V; ranking effect is H)
4. **Thin proof.** Stock photos on the homepage, About and duct page; "authorized" and "licensed" claims with no licence number shown; unsourced savings figures; case studies "coming soon". (V)
5. **Small conversion leaks.** WhatsApp prefilled texts contain unfilled [placeholders]; /book and /quote demand email and address even for urgent jobs; the menu differs between pages; the blog has not been updated since 13 July 2026. (V)

Five biggest opportunities

- Make the AMC page (clear inclusions, exclusions, price table, 30-day exit) your lead offer for villas and landlords.

- Use engineer-led positioning and signed air-balancing reports to win commercial and consultant work, where buyers value documentation over lowest price. (H)
- Add an AC repair page and a duct-cleaning page: both are high-intent and currently unserved.
- Fix tracking so WhatsApp taps, calls and forms are counted before spending on ads.
- Turn your Arabic Google reviews into an asset: there is no Arabic version of the site. (V for absence; demand is H)

No ranking or lead volume can be guaranteed; the plan below is ordered by likely commercial impact per hour of effort.

2. Website audit report

Twenty-two verified or flagged issues, ranked by priority. Scores below are my judgement from page text only; I could not see the visual design or mobile layout.

Scorecard (out of 10)

Area	Score	Why
Clarity of offer and location	7	Services, phone and CTAs are clear; homepage leads with large projects, not maintenance
Credibility and trust proof	5	Real reviews and report-based promises, but stock photos, contradictions, no licence number
Service-page SEO foundations	7	Four money pages have keyword titles, canonicals and FAQs; the rest are generic
Lead capture mechanics	6	Call and WhatsApp on every page; forms too heavy; placeholder text in WhatsApp
Content marketing	4	Seven posts, none since 13 July 2026, mostly thermostats
Local SEO signals on site	4	No area pages; address is a business centre; NAP schema NV
Technical SEO (verified part only)	5	Canonicals on key pages; several pages generic or missing; sitemap, schema, speed NV

Issues

#	Page(s)	Problem	Fix	Priority	Effort	Status
1	Home, About, service pages	Emirates coverage conflicts: "All 7 Emirates" vs "3 Emirates Served" vs "three Emirates"	Pick the true answer; use one phrase everywhere, e.g. "Dubai, Sharjah, Abu Dhabi; other emirates on request"	Critical	Easy	V
2	Home, /ac-amc-dubai vs /ac-maintenance-dubai, /smart-thermostat-installation-dubai	Google reviews shown as 27 and as 17	Use one number from your Google profile; update monthly	High	Easy	V
3	New	No AC repair landing page; repair is a section inside /ac-maintenance-dubai	Build /ac-repair-dubai (copy in Section 7)	Critical	Moderate	V
4	/services/maintenance, /ac-maintenance-dubai, /ac-amc-dubai	Overlapping intent; the generic page is titled "Maintenance & AMC"	Make /services/maintenance the commercial page; keep the other two residential, with cross-links	High	Moderate	V / ranking effect H
5	/services/ac-cleaning/premium-duct	About 150 words, no FAQ, no price, no reviews; no top-level duct page	Build /ac-duct-cleaning-dubai; fold sub-packages in	High	Moderate	V
6	/services/ventilation-fresh-air	Title "Ventilation & Fresh Air Systems" has no location or search phrase; no FAQ; no CO2 page	Retitle; add FAQ; build /fresh-air-co2-testing-dubai	High	Moderate	V
7	/about, /projects, /quote, /book, /blog, /services/maintenance, /services/ventilation-fresh-air	Canonical not detected in the metadata I could read; og:url points to the homepage; social titles say "AGEC — Engineered to Perform"	Add self-referencing canonical and correct og:url and og:title per page	High	Easy	V for og; canonical absence NV (check page source)

#	Page(s)	Problem	Fix	Priority	Effort	Status
8	Whole site	Unsourced numbers: "-23% cooling bill", "10-23%", "15-20%", "26%", "efficiency drops 20-30%", "up to 40%"	Cite the source or soften; remove "-23%" badge	High	Easy	V
9	Whole site	"Licensed", "authorized contractor", "authorized supplier" claims with no trade licence number or approval evidence	Show trade licence number, issuing authority and any DM, DEWA or Nest/ecobee authorisation documents in the footer and About	High	Easy	V that none is shown
10	Home, /about, premium-duct	Unsplash stock photos in cleaning block, About and duct page	Replace with your own job photos with before/after	Medium	Easy	V
11	/ac-amc-dubai, air-balancing	WhatsApp prefilled text contains literal [size], [area], [number], [building], [symptom]	Use a clean opener and let the person type; see Section 5	Medium	Easy	V
12	/book, /quote	Email and address are required; /quote also requires free-text details	Urgent path: name, phone, area, issue only; email optional	High	Easy	V
13	/ac-maintenance-dubai, thermostat, /quote and others	Menu lacks "AC AMC" and "Air Balancing" on many pages	One shared header on every page	Medium	Easy	V
14	/ac-maintenance-dubai	Promises "transparent fixed pricing" but shows no price; FAQ on cost gives none	Add "from" prices for a standard service visit and callout	Medium	Easy	V
15	/smart-thermostat-installation-dubai	Title tag about 80 characters; about 35 FAQs; meta over typical display length	Title under about 60 characters; keep 10-12 FAQs; shorten meta	Medium	Easy	V; truncation is general SERP practice

#	Page(s)	Problem	Fix	Priority	Effort	Status
16	/ac-maintenance-dubai	Meta description about 215 characters	Trim to about 155	Low	Easy	V
17	/blog	Seven posts, May to 13 July 2026; four on thermostats; none on AC not cooling, AC smells, duct cleaning, air balancing, CO2	Resume with the plan in Section 3	Medium	Moderate	V
18	/projects	"Detailed case studies coming soon"; no client or photo evidence on the list	Publish 3 case studies with measurements	Medium	Moderate	V
19	/about	Founder named "Mohannad Ghaboun" but the company is "Ghabboun"	Correct the spelling	Low	Easy	V
20	Whole site	No Arabic version, though your best reviews are in Arabic	Start with Arabic AMC and repair pages	Medium	Advanced	V for absence
21	/services/maintenance	Image file named "jmr-maintenance-service-dubai.jpg"	Confirm it is your own job photo and rename	Low	Easy	V filename
22	Home	Hero speaks to large projects; maintenance and AMC (your volume offer) sit lower	Add a second CTA row: "Book AC service" and "Get AMC quote"	High	Easy	V

What works, keep it

- /ac-amc-dubai lists inclusions, exclusions, a plan table, 30-day exit and a written report after each visit.
- /air-balancing-airflow-testing-dubai names instruments, process and standards, and offers a sample report PDF.
- Project photos have descriptive alt text. Call and WhatsApp are on every page.

Not verified (need tools or access)

robots.txt and sitemap.xml (my fetch tool would not open them); structured data and schema; Core Web Vitals; mobile layout; indexation status; broken-link scan; hreflang; whether the three NAP sources match. Section 10 lists what I need.

3. SEO and keyword strategy

Target ready-to-book searches first, with one page per intent. **No search volumes or difficulty scores are shown: I had no access to Keyword Planner, Semrush or Ahrefs, and I will not invent them.** Competition labels are qualitative judgements (H) from how many service companies and directories I saw targeting the phrase. Validate in Google Keyword Planner (free in a Google Ads account) before building.

Group	Primary keyword	Related terms to test	Intent and customer	Landing page	Conversion hook	Competition (H)
AC repair	AC repair Dubai	AC not cooling Dubai; AC water leaking; AC repair near me	Urgent, tenants and owners	NEW /ac-repair-dubai	Call and WhatsApp, same-day	High
AC maintenance	AC maintenance Dubai	AC service Dubai; AC servicing company	Ready to book, owners	/ac-maintenance-dubai	Book service, price from	High
AMC	AC AMC Dubai	annual maintenance contract AC Dubai; villa AMC	Comparing, landlords and villa owners	/ac-amc-dubai	AMC quote form	High, many bundled multi-trade AMCs
Air balancing	HVAC air balancing Dubai	airflow testing; TAB Dubai; air balancing report	Technical, consultants and FM	/air-balancing-airflow-testing-dubai	Technical assessment form	Medium
Thermostat	smart thermostat installation Dubai	Nest installer Dubai; ecobee Dubai	Research and buy, homeowners	/smart-thermostat-installation-dubai	Free compatibility check	Medium
Duct cleaning	AC duct cleaning Dubai	villa duct cleaning; duct cleaning price	Ready to book, villas	NEW /ac-duct-cleaning-dubai	Quote with photos by WhatsApp	High
Inspection	AC inspection Dubai	AC fault diagnosis; HVAC survey	Diagnose, owners and buyers	Section on repair page, later own page	Inspection booking	Low to medium

Group	Primary keyword	Related terms to test	Intent and customer	Landing page	Conversion hook	Competition (H)
Fresh air and IAQ	fresh air ventilation Dubai	CO2 levels office; stuffy office AC	Problem-aware, offices	/services/ventilation-fresh-air then NEW /fresh-air-co2-testing-dubai	Assessment request	Low to medium
Commercial	commercial HVAC maintenance Dubai	chiller AMC; FCU AHU maintenance; building AC AMC	B2B, FM and landlords	/services/maintenance, rebuilt	Site survey request	Medium
Villa	villa AC maintenance Dubai	villa AC AMC; AC service for villas	Owners and landlords	Villa section of AMC page; later /villa-ac-maintenance-dubai	AMC quote	High

Arabic terms to test (not yet verified): "صيانة مكيفات دبي", "عقد صيانة مكيفات".

Page priority (commercial value vs effort)

1. /ac-repair-dubai (new): highest intent, fastest to write.
2. /ac-amc-dubai: strengthen; this is your best-value offer.
3. /services/maintenance: rebuild as commercial AMC.
4. /ac-duct-cleaning-dubai (new).
5. /fresh-air-co2-testing-dubai (new, B2B).
6. Area pages: only where you can show real jobs (see local SEO).

Local SEO plan: Dubai, Sharjah, UAE

- **Google Business Profile (NV, I could not see it):** primary category the one that best fits what most customers call about; add secondary categories only for real services; list services with plain descriptions; upload your own job photos weekly.
- **Address:** the site lists a business centre in Al Karama. Use the exact same name, address and phone on the site, GBP and directories. If you do not serve customers at that address, configure the profile as a service-area business. Never use a fake or borrowed address.
- **Reviews:** ask every completed job, by WhatsApp link, within 24 hours; reply to every review; never buy or gate reviews.
- **Citations:** only reputable UAE directories and your trade bodies; check for duplicates first.

- **Area pages:** create a page only where you have completed jobs and can add original content (photos, building types, common faults). From the project list, evidence exists for Al Barsha, Business Bay, Sharjah and Ajman; confirm which areas you actively serve before publishing. Do not clone one template across dozens of areas.
- **Sharjah:** worth a dedicated page because you have villa projects there and competitors publish separate Sharjah pages. Other emirates: only on demand.

Content plan (build on real jobs)

Article	Audience	Intent	Links to	Conversion
Why is my AC running but not cooling?	Owners, tenants	Diagnose	/ac-repair-dubai	Call or WhatsApp
Why does my AC smell bad?	Owners	Diagnose	Duct cleaning, maintenance	Quote
Why is my electricity bill increasing?	Owners	Problem-aware	Maintenance, thermostat	Service booking
What is included in an AC AMC?	Landlords, villas	Compare	/ac-amc-dubai	AMC quote
How often should villa ACs be serviced?	Villa owners	Plan	/ac-amc-dubai	AMC quote
What is air balancing and when is it needed?	FM, consultants	Learn	Air balancing page	Assessment
Why are CO2 levels rising in my office?	Office managers	Problem-aware	Fresh air page	Assessment
What causes poor fresh-air circulation?	Offices	Learn	Fresh air page	Assessment
When should a thermostat be replaced?	Owners	Learn	Thermostat page	Compatibility check
AC maintenance vs duct cleaning	Owners	Compare	Both pages	Quote

Publish one article every two weeks, each with a real photo or measurement from your own work. Write them with your engineers, not as generic summaries.

4. Competitor benchmark

AGEC is strongest against competitors on documentation and engineering depth, and weakest on volume signals (reviews, years in market, area pages, content). **Limit:** I worked from search-result snippets and directory profiles, not full crawls of each rival's site, and I could not see Google rankings, Maps positions or review counts on Google. Competitor claims below are theirs, unverified.

Competitor	What I saw (their claims)	Where it beats AGEC	Where AGEC can differ
Edge DXB	Since 2016, 300+ AMCs, Silver/Gold/Platinum packages, online booking and payment, 24-hour callouts	Years in market, packaged tiers, online booking	Engineer-led diagnosis and written reports
Infiway	Since 2009, packaged AMCs for villas, apartments, buildings, 24/7 helpline	Longevity, multi-trade bundle	Specialist HVAC depth, commercial plant
European Technical	SHAMS-licensed; villa plan at AED 3,999 per year with four AC services, duct cleaning, pest control; 90-day workmanship warranty; press coverage	Bundled price, warranty, PR	Single-trade focus, per-unit transparency, TAB and ventilation expertise
Unique Technical Services	Area list (JVC, Business Bay, Downtown, Marina, Dubai Hills and more), separate Sharjah and Ajman pages, AED 200 flat standalone service, named AMC contact	Local area coverage, public one-off price, named contact	Reports, commercial work, engineering proof

Competitor	What I saw (their claims)	Where it beats AGEC	Where AGEC can differ
FAJ Technical Services	Same-day service, published callout fees, classified ads, Al Quoz warehouse	Visible pricing, ad presence	Documented work, no parts-spam copy
HVACML	Barsha Heights TAB specialist with explanatory content	Content on TAB	Combined install, balance and maintain under one contractor; sample report

Where AGEC can realistically win

1. **Lead with the AMC terms.** Few competitor snippets showed exclusions and exit terms; yours does. Add a printable sample AMC and a sample service report. (H)
2. **Own commercial and consultant work.** A signed air-balancing report, with instruments listed, is something handymen cannot offer. Ask whether you hold NEBB or AABC certification: consultants often ask; I did not see it on the site. (H)
3. **Publish prices.** Rivals show one-off prices or fixed packages; show "from" prices on every service page.
4. **Catch up on volume.** Reviews, project photos, area pages for places you actually serve, and regular posts. Market-benchmark pricing for context: a directory guide puts villa AMCs at AED 5,000-12,000 per year depending on units and scope (source); by your own table a six-unit villa on Standard is 6 x 4 x AED 320 = AED 7,680 before VAT, parts and gas, so state clearly what it excludes.

Next step to complete this section: share two or three rivals you meet most often in quotes and I will review their sites page by page.

5. Conversion optimization plan

You already have call and WhatsApp on every page; the gains are in cleaner first messages, shorter urgent forms, and a clear path per customer type. Mobile layout and click behaviour are NV: test on a phone before and after.

Six conversion journeys

Customer	Enters on	Primary CTA	Friction found today	Fix
Homeowner needing maintenance	/ac-maintenance-dubai	Book AC service	No price shown	Add "from" price, 3-field booking
Urgent repair	NEW /ac-repair-dubai	Call now (sticky button)	No dedicated page; /book asks for email and address	Call-first page; form of name, phone, area, issue
Villa owner wanting AMC	/ac-amc-dubai	Get my AMC quote	WhatsApp text has [placeholders]	Clean prefilled text; unit-count calculator
Business, commercial maintenance	/services/maintenance (rebuilt)	Request a site survey	Generic title, no FAQ	Commercial page with survey form
Air balancing or fresh air	Air-balancing page	Request a technical assessment	Short FAQ, no price or time guidance	Add typical process time, sample report link up top
Thermostat	Thermostat page	Free compatibility check	About 35 FAQs, unsourced savings figures	Trim FAQs; cite sources

Button text

Use	Wording
Header primary	Get a Quote (projects); add Book AC Service (maintenance)
Repair page	Call Now - Same-Day Visit (only if true)

Use	Wording
AMC	Get My AMC Quote
Commercial	Request a Site Survey
Air balancing	Request a Technical Assessment
Thermostat	Check My System - Free
WhatsApp (all)	WhatsApp an Engineer

WhatsApp messages (ready to use)

- General: "Hi AGEC, I need help with my AC. My area is: "
- Repair: "Hi AGEC, my AC is not cooling. Villa or apartment? Area? "
- AMC: "Hi AGEC, I'd like an AMC quote. Number of AC units and area: "
- Commercial: "Hi AGEC, we manage a building and need maintenance support. Units and location: "
- Air balancing: "Hi AGEC, we need airflow testing. Building type and problem: "
- Thermostat: "Hi AGEC, can you check if a Nest or ecobee works with my AC? Brand and model: "

Auto-reply on WhatsApp Business: confirm receipt, ask for area and a photo of the unit label, and state a response time you can actually meet. Do not promise "2 hours" and "24/7" unless staffing proves it.

Form specifications

- **Urgent repair form:** name, phone, area, one-line issue. Nothing else required.
- **AMC form** (already good): keep it; add "preferred contact: call or WhatsApp".
- **Commercial and balancing forms:** keep company and email; add "drawings available" (balancing has it).
- **Thank-you page** for each form (needed for tracking): confirm next step and time.

Landing-page headlines

- Repair: "AC Not Cooling in Dubai? An Engineer Diagnoses It Today."
- AMC: "A Fixed Yearly Price, a Named Engineer, a Report After Every Visit."
- Commercial: "One Contract for Every Chiller, AHU and FCU in Your Building."

- Air balancing: "Measured Airflow. Signed Report. No Guesswork."
- Thermostat: "Find Out Free if Your AC Can Be Made Smart."

Trust elements to add above the fold

Trade licence number, real Google rating (one number), a photo of your own team, and one line on what a visit includes. Keep promises to the ones you can honour.

6. Recommended website structure

Keep the existing money URLs; add three pages and clean the hierarchy. No full redesign is needed.

Sitemap

- Home
  - AC Services (hub)
    - /ac-maintenance-dubai (exists)
    - /ac-repair-dubai (NEW)
    - /ac-amc-dubai (exists)
    - /ac-duct-cleaning-dubai (NEW; fold in the four cleaning sub-pages)
    - /smart-thermostat-installation-dubai (exists)
  - Commercial
    - /services/maintenance (rebuild as commercial HVAC maintenance and AMC)
    - /air-balancing-airflow-testing-dubai (exists)
    - /services/ventilation-fresh-air (exists; retitle) and later /fresh-air-co2-testing-dubai
    - VRF, chillers, DX, design, testing and commissioning (exist)
  - Areas (only with real jobs): Sharjah first
  - Projects (case studies)
  - Insights (blog)
  - About, Contact, Get a Quote, Book a Service

Navigation

Home · AC Services · Commercial · AMC · Projects · Insights · Contact, plus Get a Quote and a tap-to-call button. Show the same menu and footer on every page.

Internal linking rules

1. Every blog post links to one service page with descriptive link text (not "read more").
2. Service pages link to each other where a customer would naturally want both (maintenance to AMC, duct cleaning to maintenance, balancing to fresh air).
3. Residential pages link to /ac-amc-dubai; commercial pages link to /services/maintenance.
4. Project case studies link to the service page for that system type.
5. Breadcrumbs consistent: Home / Services / Page.

7. Ready-to-use website copy

Replace anything in [brackets] with confirmed facts before publishing. Do not publish a claim you cannot show on a job record.

Homepage

- **H1:** HVAC Contractor and AC Maintenance in Dubai
- **Subhead:** Engineer-led installation, maintenance contracts and airflow testing for villas, offices and buildings across the UAE.
- **CTAs:** Book AC Service · Get AMC Quote · Request a Project Quote
- **Title (under 60 chars):** HVAC Contractor and AC Maintenance Dubai - AGEC
- **Meta (about 150):** Engineer-led HVAC installation, AC maintenance, AMC and air balancing in Dubai. Written reports after every visit. Call +971 58 557 5987.

AC Repair Dubai (new: /ac-repair-dubai)

- **Title:** AC Repair Dubai - Same-Day AC Technicians - AGEC
- **Meta:** AC not cooling, leaking or tripping? AGEC engineers find the root cause, quote in writing first and report every repair. Call or WhatsApp.
- **H1:** AC Repair in Dubai: Diagnosed by an Engineer, Quoted Before We Start

- **H2s:** Common faults we fix (not cooling, water leaks, tripping, noise, smells) · How a repair visit works · Gas top-up: when it is and is not the answer · Prices: [callout fee] and [typical repair ranges] · Brands and system types · FAQ
- **Lead paragraph:** Weak cooling is often a dirty coil, a blocked drain or a leak, not just low gas. We find the cause, tell you the price in writing, then repair it and send a short report with what we measured.
- **FAQs:** My AC runs but does not cool: why? · Why is my AC leaking water? · Is a gas top-up enough? · How fast can you come? [true answer] · Do you repair split, ducted and VRF?
- **CTA:** Call Now · WhatsApp a Photo of the Unit

AC Maintenance Dubai (existing: tighten)

- **Meta:** AC maintenance in Dubai by HVAC engineers: servicing, coil and drain cleaning, gas checks and AMC plans from AED 250 per unit per visit. Book or WhatsApp.
- **Add:** "One-off service from AED [price]" in the hero; drop "Transparent Fixed Pricing" unless prices appear.

AC Duct Cleaning Dubai (new: /ac-duct-cleaning-dubai)

- **Title:** AC Duct Cleaning Dubai - Villas and Offices - AGEC
- **Meta:** Full duct, coil and drain cleaning with disinfection and a written completion report. Villas, apartments and offices. Request a quote.
- **H1:** AC Duct Cleaning in Dubai With a Completion Report
- **H2s:** What is cleaned (grilles, ducts, coils, blower, drain, cavity) · Signs your ducts need cleaning · Duct cleaning vs AC servicing · Packages and prices · Before-and-after photos · FAQ
- **FAQs:** How often should ducts be cleaned? · How long does a villa take? · Is it different from AC servicing? · What does the report show?
- **CTA:** Get a Quote · WhatsApp Photos of Your Vents

Commercial HVAC Maintenance (rebuild: /services/maintenance)

- **Title:** Commercial HVAC Maintenance Dubai - AMC - AGEC
- **Meta:** Chillers, AHUs, FCUs and VRF maintained under one contract, with logged visits and reports for facility managers. Request a site survey.
- **H1:** Commercial HVAC Maintenance and AMC for Buildings in Dubai

- **H2s:** Systems we maintain · What each visit records · Response times by plan [confirmed] · Taking over from your current contractor · Sectors served (offices, retail, restaurants, data rooms) · FAQ
- **CTA:** Request a Site Survey

Fresh Air and CO2 (retitle now, new page later)

- **Title:** Fresh Air Ventilation and CO2 Testing Dubai - AGEC
- **Meta:** High CO2, stuffy rooms or failed fresh-air checks? We measure airflow and outdoor-air quantity, find the cause and fix it. Request an assessment.
- **H1:** Fresh Air Ventilation and CO2 Investigation in Dubai
- **H2s:** Signs of poor fresh-air supply · What we measure · Typical causes · What the report contains · FAQ

Structured data to add (check what exists first)

LocalBusiness (or HVACBusiness) with your exact NAP, FAQPage on pages with visible FAQs, BreadcrumbList site-wide, Service on each service page. Add only data that matches visible content, and test in Google's Rich Results Test.

8. 90-day execution plan

Quick wins first; long-term SEO work follows. "Dev" means a web developer; "You" means someone in the business with site admin access.

Phase	Task	Benefit	Priority	Time	Needs	Who	Success measure
Days 1-7	Reconcile emirates, review count, project count, founder name	Removes trust contradictions	Critical	2 hrs	Site CMS	You or dev	Single wording site-wide
Days 1-7	Show trade licence number and approvals in footer and About	Credibility	High	1 hr	Licence copy	You	Visible on all pages
Days 1-7	Clean WhatsApp prefilled texts; shorten /book and /quote	More completed enquiries	High	3 hrs	Dev	Dev	Form completion rate

Phase	Task	Benefit	Priority	Time	Needs	Who	Success measure
Days 1-7	Install GA4, Search Console, Tag Manager; track call, WhatsApp, form events	You can measure	Critical	4-6 hrs	Google accounts	Dev	Events visible in GA4
Days 1-7	Verify and fix canonicals, og tags on 7 pages; open robots.txt and sitemap and submit it	Technical hygiene	High	3 hrs	Dev, Search Console	Dev	Pages indexed
Days 8-30	Publish /ac-repair-dubai	Capture urgent searches	Critical	1 day	Copy in Section 7	Dev	Calls and WhatsApp from page
Days 8-30	Rebuild /services/maintenance as commercial page	Commercial leads, less overlap	High	1 day	Copy, photos	Dev	Site-survey requests
Days 8-30	Retitle fresh-air page; add FAQ	Search match	High	3 hrs	Dev	Dev	Impressions up
Days 8-30	Optimise Google Business Profile; ask for reviews after each job	Maps visibility, trust	High	1 day, then ongoing	GBP access	You	Calls and direction requests; review count
Days 8-30	Replace stock photos with your own job photos	Credibility	Medium	2 hrs per batch	Photos	You	n/a
Days 31-60	Publish /ac-duct-cleaning-dubai	New high-intent page	High	1 day	Copy, photos	Dev	Quote requests
Days 31-60	Publish three problem-solving posts (not cooling, smell, bills)	Informational traffic	Medium	3 days	Engineer input	You + engineer	Clicks in Search Console
Days 31-60	Publish three case studies from real jobs	Commercial proof	Medium	3 days	Client consent	You	Time on page; enquiries from /projects
Days 31-60	Add schema (LocalBusiness, FAQPage, breadcrumb)	Rich results eligibility	Medium	4 hrs	Dev	Dev	Rich Results Test passes

Phase	Task	Benefit	Priority	Time	Needs	Who	Success measure
Days 61-90	Review which pages convert; improve or merge weakest	Focus effort	High	1 day	Data	You	Cost per qualified lead
Days 61-90	Test Google Ads on repair and AMC (see Section 10)	Faster lead flow	Medium	2 days setup	Ads account, tracking	Specialist	Qualified leads per spend
Days 61-90	Start Arabic repair and AMC pages	New audience	Medium	1 week	Translator	Specialist	Arabic impressions

Do not start Ads before Days 1-7 tracking is live.

9. Tracking and reporting setup

Traffic is not the goal; booked jobs are. Track every enquiry from first click to invoice.

Tools (free first)

- Google Analytics 4, Search Console, Tag Manager: free.
- Google Business Profile performance: free; review monthly.
- A lead log: start with a shared Google Sheet; move to a CRM only when volume makes the sheet painful.
- Call tracking: optional at first; use a separate tracking number only on Google Ads.

Events to set up in Tag Manager and GA4

Event	Fires when
click_call	Tap on any tel: link
click_whatsapp	Tap on any wa.me link
form_submit_quote, _book, _amc, _balancing	Thank-you page loads
click_email	Tap on mailto: link

Mark these as key events (conversions) in GA4. Add UTM tags to every link you post (Google Business Profile, WhatsApp status, directories) so sources appear.

Connect enquiries to sales

Every lead goes in the sheet with these columns: date, source, name, phone, service, area, stage (new, qualified, quote sent, won, lost), quote value, invoice value, AMC yes or no. Review weekly. When a lead is qualified or won, import it back into Google Ads as an offline conversion once you run ads, so Google learns what a good lead is.

Monthly dashboard

Metric	Source
Visitors; organic visitors	GA4
Impressions, clicks, top queries	Search Console
GBP calls, direction requests, views	Google Business Profile
Call, WhatsApp and form events	GA4
Qualified leads, quotes issued, jobs won, AMCs sold	Your lead sheet
Cost per qualified lead = marketing spend / qualified leads	Calculated
Customer acquisition cost = marketing spend / new customers	Calculated
Revenue by channel	Lead sheet, invoices

A WhatsApp tap is not a lead; a qualified lead is a person with a real job in your area.

10. Business impact, budget and access needed

The highest-return work is cheap: fix trust contradictions, add an AC repair page, shorten forms, and get tracking live. Paid ads come after, once you can measure.

Budget tiers

Tier	What	Notes
Free or low cost	Claim fixes, licence display, WhatsApp text, forms, GA4 and Search Console, GBP, review requests, own photos	Hours of work; no software to buy
Moderate	Three new pages, commercial rebuild, case studies, schema, Arabic pages, a few hours a month of developer time	Get a quote from your developer; scope is small
Paid	Google Ads testing, call tracking, a CRM, an SEO specialist	Only after tracking shows what converts

Google Ads: how to start

- **Campaigns:** repair, maintenance, AMC, air balancing, thermostat, commercial; one landing page each.
- **Negative keywords to start with:** jobs, salary, course, training, DIY, free, parts, manufacturer, used.
- **Geo:** Dubai and Sharjah only at first; exclude areas you do not serve.
- **Cost data:** I found no authoritative public CPC figure. Agency pages publish ranges (for example AC repair Dubai AED 12-22 per click on one agency's blog), but these are unverified marketing claims. Pull your own estimates from Keyword Planner and set a test budget you can afford to lose; judge it on cost per qualified lead, not clicks.

Illustrative return on AMC

By your published prices, a six-unit villa on the Standard plan is 6 x 4 visits x AED 320 = AED 7,680 per year before VAT, parts and gas. Ten such contracts would be AED 76,800 per year. This is an illustration, not a forecast.

Access I need to complete the unverified parts

1. Search Console (read access) and Google Analytics 4 (viewer) for agec.ae.
2. Google Business Profile manager access, or a screenshot of categories, services, area settings and recent reviews.

3. A PageSpeed Insights report for the home, /ac-maintenance-dubai and /ac-amc-dubai pages, mobile and desktop.
4. robots.txt and sitemap.xml pasted in, or the page source of the homepage (for schema).
5. Trade licence details and any DM, DEWA, NEBB, AABC or Nest/ecobee authorisations you actually hold.
6. Which emirates you truly serve, and your real response times.
7. Two or three competitors you meet most often in quotes.
8. Any Google Ads account or past campaign data.
